SUMMARY

Final-year **B.Tech Computer Science & Engineering** student with a strong foundation in **software development**. Completed an **AI Track internship and hackathon certification with Samsung Innovation Campus**, along with a **workshop certification from appse ai Academy**. Experienced in collaborative, fast-paced environments through national and campus-level hackathons, including the **Smart India Hackathon (SIH)**. Seeking an entry-level **Software Developer** role to apply strong problem-solving and technical skills.

INTERNSHIP EXPERIENCE

Samsung Innovation Campus — AI Track Internship

Sep 2025 - Nov 2025

- Completed a structured internship program in Artificial Intelligence, covering machine learning fundamentals, neural networks, and applied deep learning practice.
- Built a Handwritten Digit Recognition capstone project using a Convolutional Neural Network (CNN) trained on the MNIST dataset, achieving 97% accuracy.
- Presented the project's application demo, explaining model architecture and live predictions to evaluators.
- Awarded a Certificate of Completion for successfully finishing the internship program.

Cyber Ops Associate & AI Workforce Internship

Jan 2026 - Feb 2026

- Built applied knowledge of AI-assisted security automation and threat analysis workflows used in modern security operations.
- Worked hands-on with Cisco Packet Tracer and the CyberOps Workstation environment to simulate network configurations and security scenarios.
- Awarded a Certificate of Completion for successfully finishing the internship program.

ACADEMIC PROJECTS

Movie Recommendation System | Python, Scikit-learn, MovieLens

- Built a recommendation engine trained on the MovieLens dataset, comparing Random Forest and Linear Regression approaches to surface relevant film suggestions.

AI-Powered PG/Hostel Management System | Python, Machine Learning

- Designed a system incorporating predictive tenant retention and smart room allocation to streamline PG/hostel operations.

To-Do List Interactive Website | HTML, CSS, JavaScript

- Built an interactive to-do list web application with dynamic task management using vanilla JavaScript.

HACKATHON EXPERIENCE

Pasuraksha AI

Hackathon Project

- Built a livestock health platform enabling secure login, an AI-driven analysis workflow on uploaded livestock photos, and routing of flagged cases to a veterinarian for review.
- Implemented a dashboard covering case history tracking and a personal profile section, giving users full visibility into every submitted case.

Samsung Innovation Campus Hackathon — Handwritten Digit Recognition Capstone Project

Sep 2025 - Nov 2025

- Selected to participate in the official Samsung Innovation Campus Hackathon as part of the AI internship cohort.
- Demonstrated the Handwritten Digit Recognition project prototype and live output to the judging panel.
- Shortlisted and advanced to the second round of the hackathon based on project quality and presentation.

CAPSTONE PROJECT

Handwritten Digit Recognition | Python, CNN, MNIST | Samsung Innovation Campus

- Designed and trained a CNN-based deep learning model on the MNIST dataset, achieving 97% classification accuracy.
- Owned the end-to-end application demo, presenting model performance and live predictions to evaluators.

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, JavaScript

Web Technologies & Frameworks: HTML, CSS, Tailwind CSS, React, MySQL, MongoDB

SOFT SKILLS

Adaptive Learner | Problem-Solving | Teamwork | Leadership

EDUCATION

Brainware University, Kolkata | B.Tech in Computer Science and Engineering Ongoing, Final Year
CGPA: 8+/10

INTERESTS

Cricket, Music, Poetry

CERTIFICATIONS & HACKATHON CREDENTIALS

- **CyberOps Associate** — Cisco Networking Academy, NIIT Foundation (Feb 2026)
- **Certificate of Participation** — Smart India Hackathon (SIH)
- **Certificate of Participation** — Samsung Innovation Campus Hackathon (2025)
- **Certificate of Completion** — appse ai Academy, Foundation Course Workshop (Aug 2026)
